Sign your name, team name and leg (even/odd). - You are not allowed to start without some Christmas detail on yourself. - Team has only ONE (1) SportIdent chip (you hand it to other runner when changing legs). - Relay is consist of 6 legs. Each members runs 3 legs. One member runs even legs, other member runs odd legs. - When you finish your leg hand your chip to second runner. And then wait for him to come back. - Legs are very short, control points are close. Be carefull. - Only the last, sixth, leg runs into the finish. Other legs handover after last control point. - There are something more but we can't rember what now. Maybe later.
<b>Remarks:</b>	There are no highway on terrain. There are impassable fences and they have a barb wire on the top (up to 1.5 m high). If you climb that fence then you are out of the game. We do not recomend scuba diving suit for running. Do not drink beer or wine while you are running. In the competition area there will be no sheep. Please leave organizers alone. Course length: around 400 m with 6-7 control points per leg. Maximum time on the course 18 min. Per leg.  Small print: If you are looking for flags then you are on the wrong path. Only SportIdent stations in terrain. We now how to spill mail/femail correctly.
